ANAND KUMAR

SENIOR SOFTWARE ENGINEER | FULL-STACK, MOBILE & GENAI

+91-97290-51796 | anandk01997@gmail.com | linkedin.com/in/anandk1997 | github.com/anandk1997

PROFESSIONAL SUMMARY

Senior Software Engineer with 5 years of experience building web, mobile, backend and GenAI applications. Strong in React/React Native, Node.js, Python/FastAPI, real-time systems and PostgreSQL/pgvector, with end-to-end delivery across appointment platforms, RAG workflows and resource planning products.

CORE SKILLS

Frontend & Mobile: React.js, Angular, React Native, Next.js, Angular, TypeScript, JavaScript, Redux, React Query, HTML, CSS, Tailwind, Material UI

Backend & APIs: Java, Node.js, Express.js, Python, FastAPI, Django, Flask, REST APIs, gRPC, GraphQL, tRPC, WebSockets, WebRTC, Pub/Sub

GenAI & Data: RAG, LLM evaluation, document processing, chunking, embeddings, pgvector, Pinecone, PostgreSQL, MySQL, MongoDB, Redis, Kafka

Cloud, DevOps & Tools: AWS, Azure DevOps, Docker, GitHub Actions, Jenkins, Git, Jira, Cypress, React Testing Library, Sequelize, Prisma, Drizzle, Supabase

PROFESSIONAL EXPERIENCE

Altimetrik India Private Limited (SLK Software) | Senior Software Engineer | Nov 2024 - Present

- Develops end-to-end mobile, web, API, and GenAI solutions using React Native, React.js, Angular, Node.js, NestJS, Python/FastAPI, and PostgreSQL.
- Builds and integrates LLM-powered applications using Retrieval-Augmented Generation (RAG) to enhance AI-driven capabilities.
- Containerizes applications using Docker and supports deployment and orchestration using Kubernetes.
- Implements and maintains CI/CD pipelines to streamline build, testing, and deployment workflows.
- Develops scalable, event-driven integrations and backend services to deliver reliable, high-performance applications.
- Skills: React Native, React.js, Angular, Node.js, NestJS, Python/FastAPI, PostgreSQL, RAG/LLM integration, Docker, Kubernetes, CI/CD, event-driven systems

Earlier Software Engineering Experience | Full-Stack Product Delivery | May 2022 - Nov 2024

- Tata Consultancy Services (Oct - Nov 2024); Netsmartz Infotech (Jan - Sep 2024); smartData Enterprises Inc. (Sep - Dec 2023).
- Cybernext Pvt. Ltd. (May - Sep 2023); Offshore Appricott Pvt. Ltd. (May 2022 - May 2023).
- Skills across full-stack projects: JavaScript, React.js, Angular, Next.js, Node.js, Express.js, Python/FastAPI, REST APIs, WebSockets, PostgreSQL, MongoDB, Redis, Git

SELECTED PROJECTS

onDemand Appointment Platform | *React Native, React.js, Node.js, WebSockets, Pub/Sub, Maps*

- Developed mobile and web experiences for appointment discovery, scheduling and counselor workflows, including interactive maps that display available model homes.
- Implemented Pub/Sub and WebSocket event flows for real-time notifications, countdown timers, request status updates and synchronized client experiences.

PRM Agent - GenAI Knowledge Assistant | *RAG, pgvector, Pinecone, Document Processing, Evaluation*

- Built an end-to-end RAG pipeline covering document ingestion, parsing, preprocessing, chunking, embeddings, pgvector indexing and context retrieval.
- Implemented evaluation workflows for retrieval and generated responses to identify quality gaps and support iterative improvement.

AppToolbox - Resource Planning Platform | *FastAPI, React.js, PostgreSQL*

- Developed modules for resource planning, organizational structures, capacity management and resource assignment.
- Delivered IT contract, vendor, application instance and financial cube workflows to centralize operational and financial planning.

Echobase - AI Workflow Platform | *Next.js, PostgreSQL, OpenAI, Supabase, Stripe*

- Built AI prompt, uploaded-file interaction and image-generation features; reduced file-upload latency and load time by 70% and supported subscription and query management through Stripe.

Beehive - Real-Time Location Tracking | *Node.js, Express.js, Socket.IO, MongoDB, Redis, Beacons*

- Developed live person tracking with beacon connectivity, peer-to-peer event flows and Redis caching for responsive location updates.

FacialDX - Healthcare Prediction Backend | *Node.js, TypeScript, Prisma, PostgreSQL*

- Developed backend workflows for nurse, doctor and patient prediction records supporting depression analysis. **Additional Products:** CashD payroll advances; MPP employee rewards; EDC clinical data collection; Smart Insurance telemedicine; Tech To Go telecom services; Listen call recording; Pragma Hub service ordering

EDUCATION

Bachelor of Business Administration (BBA) | Tilak Raj Chadha Institute of Management & Technologies
